

# Belo Scraping Test

The data science team would like to retrieve information on some blue chip companies. They found it on YahooFinance webpage and they know that the information that they want is not available in the YahooFinance's API.

Write a web scraping script to gather the information that the data scientist team wants from YahooFinance.

Tickers = ["JNJ", "BRK.B", "JPM", "MMM", "ABBV", "DIS", "T", "PG", "LOW", "CI"]

Fields = [Operating Income, Net Income From Continuing Operations, Retained Earnings, Change In Cash, Net Borrowings]

Webpage = <https://finance.yahoo.com/quote/Ticker/financials?p=Ticker>

Periods: Last 4 Quarters

Provide for the data science team the code for a code review and a CSV with the following fields: Ticker, Field, Value, End Date, Scrape Date (date you ran your code).

Example of CSV:

Ticker	Field	Value	End Date	Scrape Date
JNJ	Operating Income	5966000000	2020-09-27	2021-01-13
JNJ	Net Income From Continuing Operations	3554000000	2020-09-27	2021-01-13
JNJ	Retained Earnings	114831000000	2020-09-27	2021-01-13
...	...	...	...	...
...	...	...	...	...
